

# It's all about (no) risks...

How to increase bankability and benefit from the enormous solar business potential.

## Protect your PV assets and secure your returns!

As a **global** operating insurance broker and underwriting agency, entirely dedicated to solar, Solarif Insurance sources insurances from its network of A-rated insurers to protect your work, assets and/or returns during the construction and operational phase in the best possible way.

**Solarif Insurance** provides Construction all risk insurance, Operational all risk insurance (covering property damage, mechanical and/or electrical breakdown and business interruption), Product- and Business Liability insurance, Transit insurance, Performance bonds and Performance warranty insurance.

**Within the** Operational all risk insurance Solarif Insurance can also arrange the following additional coverages, complementing each other and thus providing extra certainties for your precious solar investment: coverage of natural disaster, lack of sun, political risk, terrorism/political violence and inherent defect.

***“A ship is always safe at the shore, but that is not what it is built for”***

*Albert Einstein*

## Inherent defect coverage

**Inherent defect** may cause serious damage. Examples of inherent defect are delamination (detachment of the various layers), bad soldering and short circuit in the junction box.

Provided that the panels used are Solarif-certified, Solarif offers a solid insurance as an extension of the operational all risk insurance package covering panel damages due to inherent defect.

### The inherent defect coverage

- supports the manufacturers' warranty (modules up to max. 20 years, inverter max. 7.5 years)
- reimburses the consequential losses, such as labour, transport and business interruption, not paid by the manufacturer in case of inherent defect
- reimburses defect panels or inverters, due to inherent defects, in case of bankruptcy of the manufacturer
- will not be terminated in case of bankruptcy of the manufacturer (insolvency coverage)
- is an optional extension of the operational all risk insurance
- is only possible if Solarif-certified panels are used

At [solarif.com](http://solarif.com) a detailed description can be found of all insurances and their coverages offered by Solarif.

**SOLARIF**  
INSURANCE

**Solarif Insurance** - *listen, analyse, advise, arrange, place, manage*

Solarif Insurance helps you protecting your investments and securing your returns by arranging, managing and delivering customised insurances for all your solar projects.

core activities

- advice and consultancy
- arranging and placement

**Solarif Group** consists of three fully autonomous, though connected divisions, complementing each other: Insurance, Matchmaker and Risk Management. It is the strength of this unique, synergetic, strategic combination that makes the Solarif business model highly effective and most efficient, which ultimately translates into long term, profitable business for Solarif customers and business partners.
